

◀ The Lead Sheet Association's Young Lead Worker of the Year award went to **Tim Fuge**, a self-employed leadworker from Cornwall.

◀ The Lead Contractors Association presented the Murdoch Award for best leadwork to **Lead-Tech Roofing** for Rygar House in London

▲ The Murdoch Sponsor's Award, also for best leadwork, went to **Leadwise Contracts** for Stormont Castle in Belfast.

Single Ply Roofing ▲ Sika Sarnafil (with Contour Roofing)

Ewart Grove, Wood Green, London

Project: New build housing.

Supplier: Sika Sarnafil

- Complex design with triangulated tower and barrel vaulted main roofs.
- Narrow secret gutter requiring use of integrated liquid waterproofing.
- Original specification was for metal standing seam roof, however, an alternative solution was sought and Zinc replica profiles were used, and PVC membrane adhered to radiused plywood.

▼ Double-Lap Slating Timby Traditional Roofing

Tait Gazebo, Gainsborough

Project: Bespoke detailing for an oak framed garden structure.

Suppliers: SIG ALM

- Project provided some unusual detailing so the contractor used the opportunity to provide training to two apprentices, who slated directly to sarking boards.
- The flashings were fabricated on site and fitted by the apprentices.

▲ Mastic Asphalt and Hot-Melt Roofing IKO PLC (with Knight Asphalt)

Westminster Cathedral, London

Project: Existing asphalt removed and renewed with a cold roof system.

Supplier: IKO PLC

- Grade I listed, high-profile iconic building. Work required a skilled contractor who had experience in roofing projects on historical buildings or churches.
- A challenge of the project was the numerous slopes and curves on the 700 sq ft roof, and steps leading up to it.
- Building had to remain weatherproof at all times so the contractor could only remove areas of existing waterproofing when they could be made watertight in the same day, including the provision of day joints.
